drying up of lakes and rivers – высыхание озер и рек

disappearance of animals and plants – исчезновение животных и растений

universal concern – всеобщая забота

man's attitude towards nature – отношение человека к природе

harmful interference – вредное воздействие

industrial enterprises – промышленные предприятия

Summary

The protection of nature

I would like to speak about the protection of the nature. Nature is the source of peoples' life. But the development of civilisation increased man's harmful interference in nature. World industrial enterprises pollute air and water. with harmful substances. Many cities suffer from smog. Beautiful old forests disappear forever. That upsets the oxygen balance. As a result many animals, birds, fish and plants disappear forever, a number of lakes and rivers dry up. These problems are the results of man's attitude towards nature. The protection of the nature should be a universal concern. We can plant trees, recycle litter, stop pollution. That's all I wanted to say.
